

A complex flowchart is overlaid on the book cover. It consists of various geometric shapes: rectangles, diamonds, and triangles, all connected by arrows. The shapes are filled with different colors: red, pink, orange, and yellow. The flowchart starts at the top with a red rectangle, moves down to another red rectangle, then to a pink diamond. From the diamond, arrows point to a pink rectangle, a red rectangle, and a pink rectangle. The pink rectangle leads to a yellow rectangle, which then leads to another yellow rectangle. There are also arrows pointing from the yellow rectangles to other shapes, including a white rectangle and an orange rectangle. The flowchart is partially obscured by the text on the right side of the cover.
